

IDAHO AAP

Making a Difference for our Kids

During the 2017 Idaho legislative session, a law was passed that directs the Department of Health and Welfare to create a public education program about a common virus called Cytomegalovirus (CMV). To view the legislative language click [here](#).

The Idaho Maternal and Child Health Program announced the launch of a website and various resources regarding CMV and how to reduce the risk of spreading it.

View the website, request free CMV Materials, and find out more about CMV by clicking the link below.
