Your baby at 2 months

Milestones matter! How your baby plays, learns, speaks, acts, and moves offers has important clues about his or her development. Check the milestones your baby has reached by 2 months. Take this with you and talk with your baby's dooter at every well-child visit about the milestones your baby has reached and what to expect next

What most babies do by this age:

Social/Emotional Milestones

- Calms down when spoken to or picked up
- Looks at your face
 Seems happy to see you when you walk up to her
 Smiles when you talk to or smile at her
- Language/Communication Milestones

- Makes sounds other than crying
 Reacts to loud sounds

Cognitive Milestones (learning, thinking, problem-solving)

- Watches you as you move
 Looks at a toy for several seconds

Movement/Physical Development Milestones

- Holds head up when on tummy
 Moves both arms and both legs
 Opens hands briefly

Title: Developmental Checklists: Ages 2 months – 5

years (DC)

Type: Checklists, Front / Back, 24 pages

Size: 8.5 x 11

Other important things to share with the doctor...

- What are some things your and your baby likes to do?
 What are some things your baby likes to do?
 Is there anything your baby does or does not do that concerns you?
 Has your baby lost any skills helshe once had?
 Does your baby have any special healthcare needs or was helshe born prematurely?

For more on how to help your baby, visit cdc.gov/Concerned

Don't wait. Acting early can make a real difference!

You know your baby best. Don't wait. If your baby is not meeting one or more milestones, has lost skills he or she once had, or you have other concerns, act early. Tak with your baby's doctor, share your concerns, and ask about developmental screening. If you or the doctor are still concerns.

1. Ask for a referral to a specialist who can evaluate your baby more, and

2. Call your stad or teritority's early intervention program to find out if your baby can get services to help. Learn more and find the number at ode.goviFindEl.

Su bebé a los 2 meses

¡Los indicadores son clave! La manera en que su hijo juego, aprende, habla, actúa y se mueve ofvece intornación importante sobre su desarrollo. Manque los indicadores que su hijo ha alcanzado a los 2 meses. Liver esta información y en cada visita de rutina de su il phable con el médios sobre los indicadores que ha alcanzado y qui esperar a cominuación.

Lo que la mayoría de bebés hace a esta edad

En las áreas social y emocional

En las áreas del habla y la comunicación

En el área cognitiva (aprendizaje, razonamiento, resolución de problemas)

- Presta estración a les ceres
 Ormienza a seguir les occes con los ojos y reconoce a les personas a la distancia
 Comienza a demostrar abunimiento si no hay un cambio de actividad ((loro, se inquieta)).

En las áreas motora y de desarrollo físico

- Puede mantener la cabeza alzada y trata de levantarse cuando está boca abojo
 Mueve las piemas y los brazos con mayor soltura

Osted conoce a su hijo mejor que nadie

Reaccione pronto si tiene preocupaciones sobre la forma en que su hijo juega, aprende, habla, actúa o se mueve, o si:

- No ha al canzado ajunos indicadores
 No responde arte ruixos buertes
 No responde arte ruixos buertes
 No sigue con la vista las costas que se mueven
 No se sornie a la gente
 No se leva las manos a la boca
 No puede ossibene la cabeza en alto cuando empuja el cuerpo hacia amba estando boca abajo

Digale al médico o al enfermero de su hijo si nota cualquiera de estos signos de posible retraso en el desarrollo y pida que le hagan una prueba del desarrollo.

- Si usted o el médico siguen preocupados:

 1. pida una remisión a un especialista y,

 2. llame al programa de intervención temprana
 de su estado o territorio para saber si su hijo
 puede rectór servicios para ayudanto. Obraga más
 información y avergiue el número teledinico en
 octo, goviltario vención Espara prana.

Tips for Talking with Parents about Developmental Concerns

TIPS	EXAMPLES
Always:	
Talk about development regularly Talk with parents regularly about their child's development - not only at times of concern - and provide them with resources so they can track milestones at home.	I om no happy to be Tople's new teachest I case a let desar marking used my children are a not due to term of how they play, bears, peak, and move for their age, so I will be looking for and tracking Tople's development milestones, and bearing its progress with you requirely. It would be great if you would look for milestones at home, too, and let me know what you're searing as well. I have soom for mentatione due this that can halp.
Share resources Encourage families to use <u>milestone checklish</u> or the <u>Allistone Moments beoble</u> to monitor their child's development of home. Find these free resources here: www.cdc.gov/Milestones	A great way to monitor Taylor's developmental milestones is with these checklist. They can help you understand typical milestones he alroud place them on the refrigerator for quick and easy reference throughout the day.
Use good listening skills ** Listen Closely, moke any contact, nod when opproprise, and be sfeet when the power it speaking opproprise, and be sfeet when the power speaking of Repair the power state of the power state of the	It sounds this you are pretty worsted and I hear you saying that you do not hear Taylor speak clearly at home. Is that correct? Let's talk about wheley or how realized at home. On you describe specific situations? Is there anything also about Taylor's development you'd like to talk about?
When you have concerns to share:	
Highlight the child's strengths Let the parent know what the child does well and the milestones the or the is meating Keep the conversation positive	We love having Taylor in class, He follows the classroom rules and really loves to sing, dance, and act during our circle time.
Make sure you are well prepared I meet tree in budding reconsight electroschips with the parents and discuss development of progress regularly Complete a milestone checklist for the child's age to help the parent know that you are basing your comments on facts and not just feelings.	Since our last meeting, I have noticed a few things about Taylor that I would like to discuss with you. We been completing a milestone druddlint for him, like I ald not all the fuldrar, and I saw he I to meeting the cognitive mislasteners vary weal. However, he is not meeting a few of this language/communication relatives. For exec, I brave noticed half Taylor doesn't peach clearly exerged for most peach to understand. As you can use on the checkful, or theyeard clid typically speaks doesn.
Encourage the parent to share any concerns with the child's doctor ■ Barnember I's not your role to make or even suggest a diagnosts ■ Barning parents of the importance of acting early on concerns	There might not be anything to be concerned about, but I do hink if is important to talk to Taylor's doctor about this in the neaf low weeks to be sure. Take this checkth with you when you go, shore it, and ad the doctor for a development screening. This will halp the doctor and you to know whether Taylor might need a little early halp. Gattley halp gard you make to be glittleworse! Let me know if you need anything from me for first doctor's appointment.
Follow-up with the family in a few weeks	Thank you for taking time to meet with me again. I know the last time we talked about Taylor's development, we were concerned about his language skills. Have you been able to talk with Taylor's doctor about his?
