

Pediatric Grand Rounds

**Pesticide Exposure and Child Health:
New Evidence and Putting it into Practice**

Presented by
Catherine Karr, MD, PhD, MS
and
Cynthia Curl, PhD, MS

Wednesday, September 16, 2020, 7:00-8:00am PT / 8:00-9:00am MT

View Grand Rounds remotely via WebEx:

1. Go to www.webex.com
2. Select **Join** (top right corner of screen)
3. Enter **Meeting Number 1265569773** , along with your name and email address. When prompted, enter the **Password ACMEC2020** to log in.
4. Connect to Audio through your computer and be sure your speakers are turned on.
5. If you are using a mobile device you may want to download the WebEx App.

CME credit is available. For more information, visit: <https://www.acmec.org/>

Presented by NW PEHSU (Pediatric Environmental Health Specialty Unit) in partnership with St. Luke's Children's Hospital, Boise, Idaho ,and Ada Canyon Medical Education Consortium

About the presenters:

Catherine Karr, PhD, MD, MS

Dr. Catherine Karr is a primary care pediatrician, pediatric environmental medicine expert, and environmental epidemiologist at the University of Washington (UW). Dr. Karr's research areas include environmental contaminants and pediatric health including asthma and neurodevelopment, health of farmworker children, and global children's environmental health. Dr. Karr directs the UW-based NW Pediatric Environmental Health Specialty Unit. This program provides consultation, outreach, and education services to health professionals in Alaska, Idaho, Oregon, and Washington.

Cynthia Curl, PhD, MS

Dr. Cynthia Curl is an Associate Professor in the Department of Community and Environmental Health at Boise State University and is the Director of Boise State's Center for Excellence in Environmental Health & Safety. Dr. Curl's research is focused on the intersection between agriculture and human health, with a particular focus on assessing pesticide exposure among vulnerable populations including pregnant women, children, farmworkers, and those living in agricultural communities. Prior to her doctoral training, she worked as a researcher for the Northwest Agricultural Safety and Health Center, and in both the private and non-profit sectors as an environmental consultant and scientist.
