

Human Papillomavirus (HPV) Vaccination Report: Idaho

Working Together to Reach National Goals for HPV Vaccination

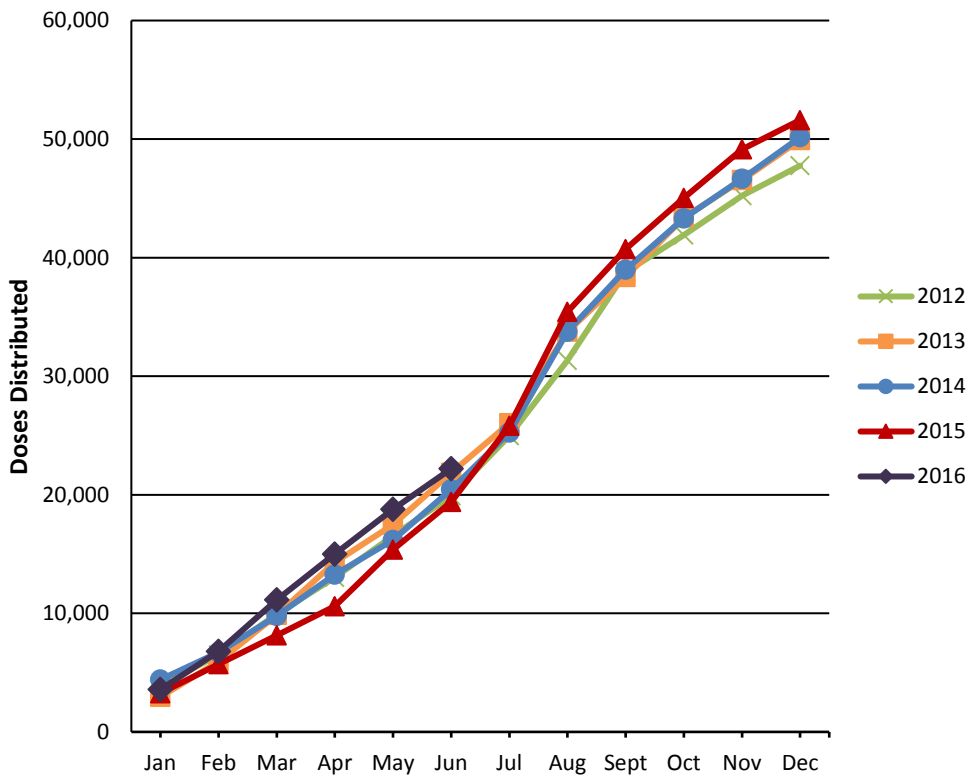

September 2016

The *Morbidity and Mortality Weekly Report (MMWR)** recently released the 2015 National Immunization Survey-Teen (NIS-Teen) data, which provides national, state, regional, and selected local area estimates of vaccination coverage. As reported in the MMWR, “In 2015, coverage with each HPV vaccine dose increased among males, however, among females, ≥ 1 dose HPV vaccination coverage increased only modestly, and no change was observed in coverage with ≥ 2 and ≥ 3 HPV doses.” As in prior years, coverage with ≥ 1 HPV vaccine dose was lower than coverage estimates for two other vaccines routinely recommended at age 11–12 years, highlighting ongoing missed opportunities for HPV vaccination when other recommended vaccines are administered. Next year, a **revised Healthcare Effectiveness Data and Information Set (HEDIS) measure will be implemented to evaluate receipt of the three recommended vaccines by age 13 years in females and males combined in one composite indicator,**** facilitating health plans’ and providers’ assessment of their performances in administering these vaccines on time to adolescents. See page 2 of this report for 2015 NIS-Teen vaccination coverage, as well as a data summary for Idaho.

2016 HPV Vaccine Distribution Trends in Idaho

Below are available year-to-date totals of CDC and non-CDC distributed HPV vaccine doses of Gardasil and Gardasil 9 in your state or city. CDC recommends examining vaccine distribution data for trends to approximate recent HPV vaccine administration, as distribution data can inform action in real time to increase vaccination.

Year-to-date Total of Distributed† Gardasil and Gardasil 9 HPV Vaccine Doses in Idaho (2012-2016)

Year-to-Date Total of Distributed† Gardasil and Gardasil 9 HPV Vaccine Doses, ID (2015-2016)

	2015	2016	% change
Jan	3,272	3,576	9.3%
Feb	5,725	6,793	18.7%
Mar	8,139	11,135	36.8%
Apr	10,587	15,003	41.7%
May	15,383	18,776	22.1%
Jun	19,410	22,199	14.4%
Jul	25,817		
Aug	35,429		
Sept	40,729		
Oct	45,046		
Nov	49,137		
Dec	51,607		

†These data represent an estimate of all Gardasil and Gardasil 9 HPV vaccine doses distributed in Idaho.

Note: Cervarix doses, which represent less than 1% of the HPV vaccine doses distributed in the United States, are not included in this report.

Human Papillomavirus (HPV) Vaccination Report: Idaho

Working Together to Reach National Goals for HPV Vaccination

September 2016

Estimates of Teen Vaccination Coverage Nationwide and in Idaho: 2014-2015

To assess vaccination coverage among teens aged 13–17 years, CDC analyzed the 2015 NIS-Teen survey data collected through questionnaires completed by vaccination providers following consents by interviewed parents or guardians.

Estimated National and State/Local Vaccination Coverage, Teens Aged 13-17 Years, NIS-Teen 2014-2015

	≥1 Tdap	≥1 MenACWY	HPV					
			Females			Males		
			≥1 dose	≥2 doses	≥3 doses	≥1 dose	≥2 doses	≥3 doses
Idaho								
2014	70.8(±6.4)	78.1(±5.8)	59.4(±10.2)	54.2(±10.2)	38.3(±9.9)	32.0(±8.7)	22.8(±7.9)	17.2(±6.9)
2015	82.5(±5.2)*	81.4(±5.2)	57.3(±8.9)	43.5(±9.0)	30.3(±8.2)	44.2(±8.9)	36.4(±8.6)*	26.4(±7.9)
United States								
2014	87.6(±0.9)	79.3(±1.1)	60.0(±1.9)	50.3(±1.9)	39.7(±1.9)	41.7(±1.8)	31.4(±1.7)	21.6(±1.6)
2015	86.4(±1.0)	81.3(±1.0)*	62.8(±1.8)*	52.2(±1.8)	41.9(±1.8)	49.8(±1.8)*	39.0(±1.7)*	28.1(±1.6)*

Ref: Reagan-Steiner et al. National, Regional, State, and Selected Local Area Vaccination Coverage among Adolescents Aged 13–17 Years: United States, 2015. *Morbidity and Mortality Weekly Report (MMWR)*. August 26, 2016.

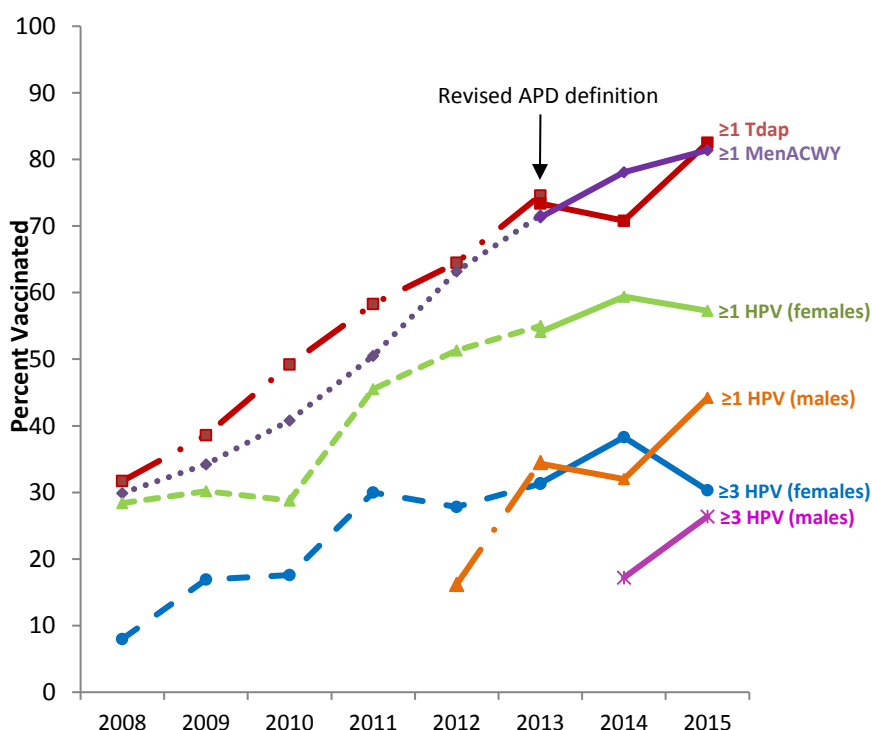

Abbreviations: Tdap= tetanus toxoid, reduced diphtheria toxoid, and acellular pertussis vaccine; MenACWY= quadrivalent meningococcal conjugate vaccine.

Tdap, MenACWY, and HPV vaccines are routinely recommended for adolescents aged 11–12 years.

*Statistically significant (p<0.05) increase from 2014 estimates.

Estimates with 95% confidence interval half-widths >10 might not be reliable.

Estimated Vaccination Coverage Among Adolescents Aged 13-17 Years, Idaho, NIS-Teen, 2008-2015

NIS-Teen estimates from 2008–2013 connected with dashed lines are previously published estimates using the previous adequate provider data (APD) definition. NIS-Teen estimates from 2013–2015 connected with solid lines use the revised APD definition. For complete footnotes, consult the MMWR article:

http://www.cdc.gov/mmwr/volumes/65/wr/mm6533a4.htm?s_cid=mm6533a4_e

2015 NIS-Teen HPV Data Summary: Idaho

Compared to estimates from 2014, HPV vaccination coverage in Idaho:

- Did not change significantly from 2014 to 2015 among females. There were non-significant decreases in ≥1, ≥2, and ≥3 dose coverage among females.
- Significantly increased from 2014 to 2015 in ≥2 dose coverage for males. There were non-significant increases in ≥1 and ≥3 dose coverage among males.
